BD BACTEC™ Myco F Lytic 50 EA

SKU: 442288

The BD BACTEC™ FX blood culture system builds on the proven history of previous BD BACTEC™ instrumentation, with advanced fluorescence detection technology, exceptional media performance and instrument reliability—adding vial-activated workflow, advanced ergonomics, blood culture observation and customer-focused data management. The easy-to-use workflow comes in a compact, modular design, which can be adapted to multiple space- and time-saving configurations for your laboratory staff.

BD BACTEC™ Standard Aerobic medium in glass culture vials

SKU: 442260

BD BACTEC™ Standard Aerobic medium is an enriched soybean-casein digest broth for recovery of aerobes. This medium provides growth conditions for recovery of bacteria and yeast from blood.

BD BACTEC™ Peds Plus medium in glass culture vials

SKU: 442194

BD BACTEC™ Lytic Anaerobic medium is an anaerobic medium designed to increase the detection and recovery of anaerobes. It contains a detergent to lyse both red and white blood cells present in the sample, releasing any intracellular organisms.

BD BACTEC™ Plus Anaerobic medium in glass culture vials

SKU: 442193

BD BACTEC™ Plus Anaerobic medium is an all-purpose, enriched soybean-casein digest broth medium capable of supporting the growth of common obligate anaerobic and facultative organisms. This medium contains resins for antibiotic neutralization.

BD BACTEC™ Plus Aerobic medium in glass culture vials

SKU: 442192

BD BACTEC™ Plus Anaerobic medium is an all-purpose, enriched soybean-casein digest broth medium capable of supporting the growth of common obligate anaerobic and facultative organisms. This medium contains resins for antibiotic neutralization.

BD BACTEC™ Standard Anaerobic medium in glass culture vials

SKU: 442191

BD BACTEC™ Standard Anaerobic medium is a general purpose medium for anaerobic blood cultures. For use with BD BACTEC™ instrumented blood culture systems, this medium provides qualitative culture and recovery of anaerobic microorganisms from blood.

BD BACTEC™ FOS Culture Supplement Kit

SKU: 442153

The BD BACTEC™ FX blood culture system builds on the proven history of previous BD BACTEC™ instrumentation, with advanced fluorescence detection technology, exceptional media performance and instrument reliability—adding vial-activated workflow, advanced ergonomics, blood culture observation and customer-focused data management. The easy-to-use workflow comes in a compact, modular design, which can be adapted to multiple space- and time-saving configurations for your laboratory staff.

BD BACTEC™ Aerobic Platelet testing medium in plastic culture vials

SKU: 442053

BD BACTEC™ Standard Aerobic medium in plastic culture vials

SKU: 442027

BD BACTEC™ Standard Anaerobic medium is a general purpose medium for anaerobic blood cultures. For use with BD BACTEC™ instrumented blood culture systems, this medium provides qualitative culture and recovery of anaerobic microorganisms from blood.

BD BACTEC™ Standard Anaerobic medium in plastic culture vials

SKU: 442024

BD BACTEC™ Standard Anaerobic medium is a general purpose medium for anaerobic blood cultures. For use with BD BACTEC™ instrumented blood culture systems, this medium provides qualitative culture and recovery of anaerobic microorganisms from blood.

BD BACTEC™ Plus Aerobic medium in plastic culture vials

SKU: 442023

BD BACTEC™ Plus Anaerobic medium in plastic culture vials

SKU: 442022

**BD BACTEC™ Lytic
Anaerobic medium in plastic
culture vials**

SKU: 442021

BD BACTEC™ Lytic Anaerobic medium is an anaerobic medium designed to increase the detection and recovery of anaerobes. It contains a detergent to lyse both red and white blood cells present in the sample, releasing any intracellular organisms.

**BD BACTEC™ Peds Plus
medium in plastic culture
vials**

SKU: 442020

Quantity - Shelfpack 50

**BD BBL™ Sub/Venting Units
for Blood Culture Bottles 100
EA**

SKU: 271056

Vent Aerobic 50 EA

SKU: 249560

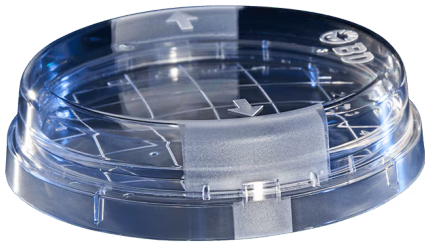

Plate Columbia Anaerobe SB

20 Ea

SKU: 221928

BD BBL™ prepared plated media enable the isolation of microorganisms from samples or specimens. Ready for immediate use, they are routinely available in several types of Petri-style dishes, containing a variety of media.

Shelf Life (Days) 98
